

Permanent Cosmetics - Eyeliner Aftercare

WOW! You look great. Thank you for trusting us with your eyes. Here are the things you need to do, and not do.

TO DO:

Keep the areas clean and dry!

If your eyes are feeling too dry or irritated, you can use a mild soap to cleanse your eyelids. Then you can also use lubricating eye drops if you need to!

Please, Do Not:

Pick or scratch at the area. Some scabbing is 100% normal and its best to let them scab and fall off. Anything you tear off will most likely take the pigment with it. Leave your beautiful self alone.

We ask that you please keep any makeup off of the tattooed area for at least 7 days. Please make sure when you start using makeup again, you use brand new mascara and clean brushes so that the risk of any nasty bacteria from your makeup goes down.

Also you need to be super gentle with your freshly tattooed skin, so applying any makeup that doesn't come off easily is probably not the best idea. Please, please, please use a mild, unscented soap to remove any makeup and to keep the area generally clean. Baby soap is perfect, and usually is tear free.

Please don't use an eyelash curler for 72 hours after your eyeliner tattoo. Once the 72-hour period is up, please clean your eyelash curler with an alcohol wipe before you use it. Thanks!

Don't rub or stretch the tattooed area, and keep yourself looking amazing!!!

Please don't wear contacts for 24 hours after your procedure. Glasses are super hot, and everyone should rock them, so do that.

If you have any questions CALL US! We are here for you.
